

# SUDEEN JAIN H R

AI & Machine Learning Engineer | Full-Stack Developer

Mangalore, India | [sudinh1@gmail.com](mailto:sudinhr1@gmail.com) | [github.com/sudeenjain](https://github.com/sudeenjain) | [linkedin.com/in/sudeenjain](https://linkedin.com/in/sudeenjain)

## Professional Summary

---

AI & Machine Learning engineering graduate with hands-on experience in full-stack web development, machine learning, cloud technologies, and database-driven applications. Experienced in building and deploying practical software solutions using Python, JavaScript, PHP, SQL, Supabase, and modern web technologies.

## Technical Skills

---

**Languages:** Python, Java, JavaScript, SQL, HTML, CSS, PHP

**AI/ML:** TensorFlow, Scikit-learn, OpenCV, Pandas

**Web & Backend:** React, Node.js, Flask, FastAPI, REST APIs

**Databases & Cloud:** MySQL, PostgreSQL, Supabase, MongoDB, AWS, Azure, Google Cloud

**Tools:** Git, Docker, Linux

## Experience

---

### AI & Machine Learning Internship — Averix Solutions

- Built strong foundations in AI & ML concepts, applied learning through practical tasks, and developed problem-solving skills aligned with industry expectations. Recognized under AICTE.
- Technologies: AI, Machine Learning, AICTE, Problem Solving, Data Analysis

### Front-End Web Development Internship — Edunet Foundation & IBM SkillsBuild

- Gained hands-on experience building responsive and interactive web pages, working with HTML, CSS, JavaScript, and modern frameworks. Strengthened UI/UX design principles and deployment sk...
- Technologies: HTML, CSS, JavaScript, UI/UX, Responsive Design, IBM SkillsBuild

### Emerging Technologies AI & Cloud — Edunet Foundation & IBM

- Strengthened skills in AI and Cloud platforms while gaining hands-on exposure to real-world applications. In collaboration with AICTE and IBM.
- Technologies: AI, Cloud Computing, IBM, AICTE, Emerging Tech

### UI/UX Design Internship — Snestron Systems Pvt. Ltd.

- Enhanced understanding of user-centered design and creative problem solving. Completed a 4-week online internship contributing meaningfully to design projects.
- Technologies: UI/UX, User Research, Prototyping, Design Thinking, Figma

## Selected Projects

---

### Game Level Difficulty Balancer

*Python, Algorithms, DAA, Dynamic Programming*

- An algorithmic solution that dynamically optimizes game difficulty curves using DAA principles ensuring engaging, balanced gameplay.
- GitHub

### Book Recommender System

*Java, Advanced Java, Recommendation Engine*

- An intelligent book recommendation engine built with Advanced Java that suggests titles based on user reading preferences and behavior patterns.
- GitHub

### IBM ML Recommender

*Python, Machine Learning, Collaborative Filtering, IBM*

- A Python-based collaborative filtering system that leverages machine learning to predict user preferences and generate personalized recommendations.
- GitHub

### Interactive Recipe Finder

*HTML, CSS, JavaScript, API Integration*

- A dynamic web application enabling users to search, filter, and discover recipes with real-time ingredient matching and beautiful UI.
- GitHub

### Currency Converter

*JavaScript, REST API, Exchange Rates, Responsive*

- A real-time currency exchange tool that connects to live APIs supporting 150+ currencies with instant conversion rates and clean interface.
